PRIMARY EXAMINER
GROUP 1100 1795

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anne M. Kornbau (25,884) on October 12, 2007.

The application has been amended as follows:

In the amended claims of 9/26/07 (entered)

In claim 10, at lines 2-3, please replace "but not substantially absorbs visible light with a wavelength of over 600 nm and" with - - which- - .

In claim 10, at line 12, please replace "pit" with - - pitch- - .

2. The following is an examiner's statement of reasons for allowance: The prior art evidences the styryl dyes having absorption maxima at wavelengths of ~425 nm in JP 05-038878 and there is no evidence that the dyes of JP 60-083892 meet this limitation. Further as disclosed laser (HeCd) operates at 442 nm, there is no motivation to have the absorption maximum more than 40 nm from this, but rather from the standpoint of sensitivity it would be best of the laser and the absorption maxima were the same.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
